

West Georgia Health's New South Tower

West Georgia Health has changed a lot in its more than 70-years of serving this region. But our commitment to providing exceptional service and the best possible clinical care remains as true today as it was then. And we are continuously focused on making West Georgia Health an even better place for your and your family's health.

Our new South Tower is just one way we are ensuring that we can better meet the needs of families throughout this region. Featuring the latest in technology and patient-centered design, the South Tower includes an expanded Heart Clinic, Emergency Department, Intensive Care Unit (ICU) and Maternity Services Department.

The South Tower also provides a new front entrance for the Medical Center. Patients and visitors can access the new main entrance from Medical Parkway, which runs between Vernon St. and Vernon Rd.
